SCHOOL BUILDINGS

Case Studies

CASE STUDIES  
**SCHOOL  
BUILDINGS**

Suitable Products for the Education Industry:

-  Room Module
-  Solopod (Bathroom Pod)
-  Light Steel Frame Façade
-  Light Steel Frame Structure

Modular construction is perfectly suited for school buildings, enabling a significantly faster build programme thus allowing facilities to open on time for the start of term.

1

# St Aidan's, Ilford

- ◆ **SIZE:** New classroom block
- ◆ **CLIENT:** St Aidan's Primary Catholic Academy
- ◆ **ARCHITECT:** Arcadis

St Aidan's School, Essex

Elements Europe has been appointed by St Aidan's Primary Catholic Academy as the main contractor and off-site manufacturer to deliver a new classroom block.

The project will see Elements Europe provide a turnkey solution for St Aidan's Primary Catholic Academy, demolishing the existing classroom block and re-building it over two storeys to create 9 new classrooms, 2 offices and 2 WCs.

A total of 36 Room Modules will be manufactured and installed which will include the class rooms, stairwells, corridor cassettes and WCs. The modules have been designed with adaptability in mind allowing for 2 classrooms or 1 large space for events.

The new class block has been designed to look like the existing building and careful attention will be paid to the external landscaping.
